**Kane-Ace resin price increase**

Dear customer,

from April 1<sup>st</sup>, Kaneka Belgium will increase the selling price for its impact modifiers and processing aids. We are pushed to do so due to the continuing sharp increase of raw materials cost, which is strongly enhanced by the very tight global availability of certain monomers.

<u>Product group</u>	<u>Increase euro/kg:</u>
Kane Ace B series, MBS impact modifier resins	0.2
Kane Ace PA series, Acrylic processing aid resins	0.13
Kane Ace FM series, Acrylic impact modifier resins	0.13

We will contact you in the very near future to explain you in more detail and to answer any questions you may have regarding this matter.

We value very much your confidence in Kaneka and would like to ask for your understanding.

Yours Sincerely,

Olivier Renson  
Business Manager
