Policy Statement Kaneka Belgium | Energy & CO2

Vision & Mission

THE DREAMOLOGY COMPANY - MAKE YOUR DREAMS COME TRUE

This statement expresses our vision to make the wishes of people come true through the power of science and chemistry. Our innovative solutions enable us to create unique products and technologies, protecting the global environment and enriching people's lives.

Leading Principles

1. In our processes and activities we will always look for **minimal use of energy**. Suggestions for improvement are encouraged and documented in REAL for further follow up. In this regard we meet all legal requirements.
2. We continuously evaluate **energy projects** that will reduce the impact of our processes and activities. These projects will be correctly documented and monitored for execution. As well for any other project the energy impact will be evaluated.
3. In the **procurement process for external services or products**, energy consumption is an important decision factor to determine the final supplier.
4. We continuously **educate our employees and make them aware** of the importance related to reducing our energy consumption in our processes and activities.
5. After a successful period 2010-2020, during which the specific energy consumption was decreased by 34,9%, a **new energy-saving target of -5% for the next period 2020-2030 is set forward for Kaneka Belgium**. Since the high specificity of processes at **KMD**, here the target is **to stabilize the energy consumption**.
